Experience

Frontend Software Engineer - AMTS - Athenahealth – Bangalore, India. July 2022 – Present

- Engineered a high-traffic platform, *athenahealth.com*, utilizing *React*, *Node.js*, and *Drupal*, enhancing SSR efficiency in TypeScript, driving a 30% surge in user engagement across *300+ URLs* and *1M+* monthly visitors.
- Overhauled forms with *Formik & Yup*, elevating submission rates to *70% via UI* and validation refinements.
- Integrated *profanity detection system* with Node.js middleware and REST APIs, cutting inappropriate entries by 65%.
- Conceptualized a *Resource Center* with multi-page generation and *tag-based filtering*, serving *5+ lakhs* visits.
- Constructed *20+ React components* using *Material UI & Context API*, amplifying reusability and maintainability.
- Refined *performance* metrics by securing an *85 Lighthouse score* through image optimizations, layout stability improvements, lazy loading, and code splitting.
- Instituted *Jest unit tests* achieving *90% coverage*, reducing post-deployment issues by 20% and fortifying reliability.
- Assembled *UI interfaces* using Stylus, materializing *50+ Figma* designs into interactive elements.
- Configured *CI/CD pipelines in Jenkins*, automating testing, build, and deployment workflows.
- *Championed* code quality by reviewing pull requests, *guiding two developers*, and streamlining task execution.
- Led Agile ceremonies as *Scrum Master*, refining sprint retrospectives and stand-ups to enhance team efficiency.

Intern, Athenahealth – Bangalore, India

January 2022 – June 2022

- Scripted *automation* workflows in Java/Selenium, expanding *test coverage* to 70% of the platform.
- Applied BEM (Block Element Modifier) methodology in CSS, achieving a 10% reduction in page load times.
- Redesigned navigation with React Router, amplifying user interactions by 60%.

Projects

ReactFlow Node Chart

[Live URL](#)

- Designed an interactive *node-based graph* environment using React Flow, integrating custom nodes, and implementing state management via *Zustand*, while developing a modular node abstraction layer for analytical insights with *Python FastAPI*.
- Regulated 10+ node types with real-time ReactFlow handlers for an engaging user Interface.
- Released the project as a *Progressive Web App (PWA)* with SCSS and TanStack Query, embedding a service worker for offline accessibility.
- **Tech Stack:** React | Zustand | TanStack Query | SCSS | Python

Steamer

[GitHub URL](#)

- Developed a *Steam profile tracking tool* with React, TypeScript, and *OpenID* authentication, integrating Steam API for user data retrieval spanning 10+ routes.
- Formulated *RESTful APIs via Node.js & Express*, streamlining authentication, session and profile data handling.
- Structured data-fetching logic with *TanStack Query*, minimizing redundant API requests *by 40%*.
- Embedded *Redis caching* for frequently queried Steam profiles, refining speed and diminishing server strain by 60%.
- Validated system integrity through *Jest-powered unit testing*, covering *80% of key functionality* to ensure reliability.
- **Tech Stack:** React | Node | Express | TypeScript | Redux | Redis | Vite | Storybook | Jest | TanStack Query

Skills

Frontend Technologies: React, Redux, Zustand, TypeScript, HTML5, CSS/SASS, Stylus, Tailwind.

UI/Design & Testing: Material UI (MUI), Ant Design, StoryBook, Figma, Jest, Cypress.

Build Tool & version control: Webpack, Babel, Vite, Git, Jenkins.

Education

Sri Krishna College Of Engineering and Technology – B.Tech in Information Technology

May 2018 - May 2022
